## GSV & Switching Items

Clicking this icon will reveal the drop down menu where you should be able to select “Clear Selections”.  
If selections doesn't clear, you may have to clear each line manually.

Once your selections have been cleared, you may proceed with your Switch Items function.

For any items that don't auto switch, simply select the original item in the left column and see it light up “blue” on your floor plan. You can then locate the appropriate similar item in the new Catalog. Select and click Manual to replace. Do this with each item that did not Automatically Switch.
