Moving Labels on Cabinets

Moving Labels on cabinets can greatly enhance the customer's ability to understand the design. Quite often we will place cabinets without a second thought that the Nomenclature or Item# if using a Legend is hidden by something in the design above the label.

Right Clicking on any cabinet, appliance or decorative item with a label will allow you to move and rotate and place the label to the location and position you want.

See Next Page to continue:

Click on the item that you wish to move the label on and select Move Label from drop down list. You will be given a rectangle that can be positioned and rotated by right clicking your right mouse button again. Once in desired position, left click to lock in place.

Please be the professional and manage homeowner expectations.
Availability of materials continues to be unpredictable. When disruptions occur, they impact shipping schedules and trigger backorders. Advise homeowners **NOT** to tear out kitchens and baths until cabinets are delivered and inspected.
